

# Nutritional care for Patients with Ebola Virus Disease in Ebola Treatment Units

## **Frequently Asked Questions on Nutrition and Ebola Virus Disease**

(Plus other filovirus diseases such as Marburg Virus Disease  
and Lassa Fever)

## **Acknowledgements**

This guidance was initiated as a result of a question posed to the Global Nutrition Cluster Technical Alliance and based on previous work done on this topic<sup>[1]</sup>. It was completed by a 'Taskforce on the nutritional care of Ebola patients in Ebola Treatment Units' established under the umbrella of the Alliance with funding support from UNICEF. It was coordinated and co-chaired by John Hopkins University/ CDC and WHO. We would like to acknowledge Cinthya Moshtagh and Mija Ververs for their contributions to the writing of earlier drafts. We also like to express gratitude to Theresa Li for her specific inputs in the food system section. We are grateful to Kerstin Hanson for her substantial work on writing and finalizing the latest version of the guidance as well as Julia D'Aloisio for her editing inputs. In addition, we would like to thank Janet Diaz, Anaïs Legand, Jamie Rylance, and Victoria Willet (WHO) for their helpful additions.

We acknowledge the following Taskforce Members (in alphabetical order) for their generous contributions in discussing, reviewing and/or editing for technical content of this guidance: Andrew Beckingham, Suzanne Brinkman, Megan Coffee, Kirrily de Polnay, Tracy Kelly, Willy Mavula Mbemba, Emmanuel Kalufenye Ngengele, Tolbert Nyenswah, Indi Trehan and Mija Ververs.

## **About the GNC Technical Alliance:**

The GNC Technical Alliance is a technical assistance platform that responds to technical requests, by leveraging and building on existing nutrition resources, capacities, initiatives, and coordination structures. The Alliance supports practitioners by delivering the following services: 1. Access to high-quality information, capacity-strengthening resources, guidance and research that has been curated by global nutrition specialists and agencies; 2. Where guidance is limited, timely access to interim consensus-driven guidance for emerging technical issues in humanitarian nutrition, including guidance on program adaptation; 3. Access to experienced nutrition technical specialists to answer questions, or to provide more in-depth support (remote or in-country). The Alliance is led by UNICEF and co-led by World Vision International and supported by a leadership team composed of UNICEF Programme Division, WVI, the GNC-CT, Emergency Nutrition Network (ENN) and Action Against Hunger Canada (ACF-Ca). ## Table of Contents

<b>Introduction</b> .....	<b>1</b>
<b>General 1. What are the key aspects of nutritional care in Ebola Treatment Units (ETUs)?</b> .....	<b>6</b>
<b>General 2. What are the principal roles required for ensuring quality nutritional care in Ebola Treatment Units (ETUs)?</b> .....	<b>10</b>
<b>General 3. What special considerations should be taken to provide individual feeding support to Ebola Treatment Unit (ETU) patients?</b> .....	<b>14</b>
<b>General 4. How should nutritional care be monitored in an ETU?</b> .....	<b>16</b>
<b>General 5. What are the recommendations for addressing nutritional needs of convalescent patients upon Ebola Treatment Unit (ETU) discharge?</b> .....	<b>19</b>
<b>Patient Care 1. How should a nutritional assessment be carried out in an Ebola Treatment Unit (ETU)?</b> .....	<b>21</b>
Annex 1. Tips for assessing food tolerance and appetite (children 6 months of age and older).....	26
Annex 2. Food tolerance and appetite test - decision tree.....	27
Annex 3. Feeding support assessment.....	28
<b>Patient Care 2. What are general dietary recommendations and food suggestions for Ebola Treatment Unit (ETU) patients (of all ages and population groups)?</b> .....	<b>29</b>
Annex 1. Weekly menu examples for solid and semi-solid diets (must be properly adapted and blended for semi-solid diet).....	35
Annex 2. Examples of breakfast, lunch and dinner recipes for solid and semi-solid diets (must be properly adapted and blended for semi-solid diet).....	37
<b>Patient Care 3. How should infant and young child feeding (including breastfeeding) be managed in Ebola Treatment Units (ETUs)?</b> .....	<b>41</b>
<b>Patient Care 4. When and how should specialized nutrition products be used in Ebola Treatment Units (ETUs)?</b> .....	<b>48</b>
Annex 1. Recipe for BP100porridge.....	55
<b>Patient Care 5. When should nasogastric tube feeding or total parenteral nutrition be used in Ebola Treatment Units (ETUs)?</b> .....	<b>56</b>

<b>Patient Care 6. What are the dietary recommendations for Ebola Treatment Unit (ETU) patients with diarrhoea and/or vomiting and subsequent electrolyte abnormalities?.....</b>	<b>59</b>
Annex 1. Recipes for rice water and rice porridge.....	61
Annex 2. Foods rich in potassium.....	62
Annex 3. Foods and drinks that are rich in calcium or sodium.....	64
<b>Food Systems 1. How should meal preparation and food/drink distribution be managed in ETUs? (ETU food system).....</b>	<b>68</b>
<b>Food Systems 2. Where should ETU meals be prepared? .....</b>	<b>71</b>
<b>Food Systems 3. What measures should be taken to ensure proper food hygiene in Ebola Treatment Units (ETUs)?.....</b>	<b>72</b>
Annex 1. Food storage checklist.....	77
Annex 2. Food hygiene during preparation checklist.....	79
<b>FAQ Food Systems 4. How should food be safely transported to and within an Ebola Treatment Unit (ETU)?.....</b>	<b>82</b>
<b>Food Systems 5. What instructions can be provided to families and friends who want to provide meals for an Ebola Treatment Unit (ETU) patient?.....</b>	<b>85</b>
Annex 1. Suggestions for families/friends wishing to provide meals for an ETU patient.....	86
<b>References for ETU Nutritional Care FAQs.....</b>	<b>88</b>
