

Global **NUTRITION** CLUSTER

The Global Nutrition Cluster helps prevent and treat malnutrition in all its forms through strengthening the technical and coordination capacities of nutrition actors to prepare for, respond to, and recover from nutrition emergencies within humanitarian crises.

Coordination

Information Management

NiE Technical Support

We are a holistic support platform where all nutrition actors globally can meet their needs for coordination, information management, and Nutrition in Emergencies (NiE) technical support in humanitarian emergencies.

OUR SUPPORT

We support governments, international and national actors and community-based nutrition practitioners with strategic decision-making, planning and strategy development, capacity strengthening, advocacy, NiE programming, and preparedness.

We help to ensure humanitarian principles and standards are met and key humanitarian commitments such as protection, localisation, accountability to affected populations, disability inclusion, and gender-based violence risk mitigation are mainstreamed in the collective response.

OUR SERVICES

High-quality, expert-backed professional resources, tools and guidance

In-country and remote support from nutrition experts in key technical and thematic areas

Fast and highly specialized virtual and in-country support for coordination and information management to countries

Learning and capacity strengthening opportunities through GNC Learn, trainings, webinars, and events

A community of nutrition practitioners to collaborate with and share knowledge

The GNC is led by UNICEF (the Cluster Lead Agency) and has more than 50 partners representing international non-governmental organizations, research & development groups, academic institutions, UN agencies, local organizations, donors and individuals. The Technical Alliance is led by UNICEF and Save the Children.
